### **Future Work Skills 2020 Report (1st link at bottom of the web page under Downloads)**

<http://www.iftf.org/futureworkskills/>

Pick a driver other than Extreme Longevity from those in the Future Skills graphic. Prepare a 1 min report (oral or media) that clarifies the key components of that driver.

Here's a sample of my notes when doing an oral presentation.

### **EXTREME LONGEVITY (green)**

Fact: people are living longer

Impact: Lifestyles are steadily becoming more health driven (quality of life). Organizations need to become more diverse and flexible to leverage the workforce.

Future Skills:

Transdisciplinarity: Complex problems require both general and specific knowledge. Teamwork among experts in diverse fields who can and will take the time to gain a general understanding of their peers' specialties is the structure which will produce the true cutting edge solutions.

New Media Literacy: Employers, customers and co-workers will expect communication in more engaging and informationally dense formats. The ability to produce effective, efficient, engaging media presentations will become a more standard workplace skill.
